

# Do You Wanna Science?!?

1. Are you interested in science?
2. Are you having problems in your science classes now?
3. Do you want help in your science classes in the future?
4. Have questions like:
  - Can I become a scientist?
  - Where can I meet other science majors like me?
  - What can I do with a science degree?

This is a program that prioritizes the assistance of financially and educationally disadvantaged students seeking majors in math and science-based fields, but we welcome all STEM (science, technology, engineering, and math) majors.

Information and support sessions will be held 6:30-7:30 pm.

May 13      June 10      July 8      August 12
